

## Task 2: Superstore Sales Analysis

Intern Spark Data Analytics Internship | Alfido Tech

**Goal-** Analyse sales performance across regions, categories and time. Identify best/worst performing products and seasonality patterns.

### Key Insights

- The **West region** is the strongest performing region and contributes the highest share of total sales.
  - The **Technology** category is the top revenue generator, significantly outperforming Furniture and Office Supplies.
  - The product **“Canon image CLASS 2200 Advanced Copier”** is the clear best-seller and should be treated as a flagship product.
  - Several products show consistently low sales, indicating possible issues with demand, pricing, or visibility.
  - Clear seasonality exists — sales reach their peak in **November**, suggesting strong year-end buying behaviour.
- 

### Key KPIs

| Metric              | Value          |
|---------------------|----------------|
| Total Revenue       | \$2,261,536.78 |
| Total Orders        | 4,922          |
| Average Order Value | \$459.48       |
| Profit Margin       | Not available  |
| Conversion Metrics  | Not available  |

## **Tactical Recommendations for Alfido Tech**

1. **Double down on the West region** Allocate higher marketing budget and inventory to the West region since it already delivers the highest sales.
  2. **Prioritize the Technology category** Increase promotions, bundles, and visibility for Technology products as they contribute the maximum revenue.
  3. **Push the top-selling product harder** Create special campaigns and featured listings for the “Canon image CLASS 2200 Advanced Copier” to maximize its performance.
  4. **Review underperforming products** Analyse the lowest-selling products and either improve their pricing/marketing or phase them out to free up resources.
  5. **Plan inventory & promotions for November** Stock up and launch targeted campaigns before November to fully capitalize on the peak sales period.
